RE: Certification Status for the IATF 16949: 2015 standard

Dear Ms. Gerarge,

This is to confirm that Modern Heat Treat, Kersey Plant. completed the IATF 16949 Transition Reassessment on 9/6/2018 prior to the transition deadline of 9/14/2018 and maintained a valid TS 16949 2009 certificate: IATF 0228742/T452 at that time. NQA will be making a certificate decision upon a completed review of the file no later than 1/4/2019.

As per the IATF Transition Strategy document on page 11:

- The certification body can make a positive certification decision after the expiration date of the existing ISO/TS 16949:2009 certificate, as long as the decision is made within a maximum of 120 calendar days from the last day of the transition audit; the ISO/TS 16949 certificate was valid; and the transition reassessment audit was conducted prior to the 9/14/2018 deadline.

Based on the IATF statement above, Modern Heat Treat, Kersey Plant is in compliance with the transition strategy and remains in good standing to conduct automotive business.

Please let me know if you require any further information.

Best regards,

Kathy Ouellette
