## **Modern Industries installs new Swiss Tsugami B0326-II CNC Machine in December 2014.**

Erie, Pa - Modern Industries has expanded machining capabilities and services offered to customers with purchase of our new Swiss Tsugami B0326-II CNC Machine.

The B0326-II will offer production flexibility, a reduction in material costs, and the ability to quickly changeover tooling in order to reduce machine time. A dual path Fanuc 32i-B CNC slashes cycle time by permitting simultaneous operation of the main and sub spindle.

Additional capabilities include:

- Chucking or Guide Bushing Capability
- 5-Axis
- Synchronized Machining with Main and Sub Spindle
- 12' Bar Length Capacity

For more information on Modern Industries machining capabilities, please contact our sales department at [mmdsales@modernind.com](mailto:mmdsales@modernind.com) or visit our website at [www.modernind.com/Machining](http://www.modernind.com/Machining).

Modern Industries is a regional authority and leader in the precision machining and assembly industry. The company is ISO 9001:2008, AS-9100, and TS-16949 certified in order to offer the highest quality products to our customers. Modern has over 65 CNC machine tools plus support equipment, the largest on-site heat treating facility in western Pennsylvania, and a complete materials testing facility in house. For more information about how we can help your company, please call (814) 455-8061 to speak with a Modern Industries representative. Learn more about us online at [www.modernind.com](http://www.modernind.com) or send any inquiries to [mmdsales@modernind.com](mailto:mmdsales@modernind.com).
